Infection Control in the Era of SARS-CoV-2

Test your Knowledge

1. Coronaviruses are very difficult to kill on surfaces with the disinfectants that are currently available.
   
   a. True  
   b. False

2. What is the period of time for “self-isolation” following possible exposure to a suspected case of COVID-19?
   
   a. 2 days  
   b. 5 days  
   c. 14 days  
   d. 21 days

3. Droplets are considered to have a higher viral load than aerosols.
   
   a. True  
   b. False

4. The current standard precautions practiced in dentistry has focused on infectious body fluids.
   
   a. True  
   b. False

5. The aerosols produced in dentistry (air water syringes, ultrasonic scalers, dental drills) have been shown to travel up to ______.
   
   a. 3 feet  
   b. 6 feet  
   c. 12 feet  
   d. 20 feet

6. The antibody blood tests currently available are being used to confirm a SARS-CoV-2 infection.
   
   a. True  
   b. False
